## PROFESSIONAL SUMMARY

Data Analyst with hands-on Internship Implementing Excel, SQL, and Python to analyze business data, improve data quality, and streamline reporting. Experienced in working with 10,000+ records, automating repetitive tasks, and building dashboards to track business performance. Skilled in Pandas, Power BI, GenAI, and prompt engineering, with practical experience using Antigravity and RAG workflows to improve data analysis and information retrieval.

## TECHNICAL SKILLS

**Programming Languages** : Python, SQL  
**Libraries & Frameworks** : Pandas, NumPy, Matplotlib, Seaborn.  
**Databases & Analytics** : MySQL, Advanced Excel, Power Query, Power BI, Tableau, Data Analytics, Business Intelligence.  
**Developer & AI Tools** : Git, GitHub, VS Code, Jupyter Notebook, Antigravity  
**Core Competencies** : RAG Pipeline, Prompt Engineering, Data-Driven Decision Making, Analytical Problem Solving

## PROFESSIONAL EXPERIENCE

### Vangrove Tech Private Limited

Junior Analyst Intern

Hyderabad  
01/2026 – Present

- **Improved** weekly reporting accuracy by **10%** using **Excel, SQL, and Power Query** to clean and review business data.
- **Reduced** manual data extraction by **12 hours per week** by creating reusable **SQL queries** and automated **Excel reports**, simplifying recurring data collection and making regular analysis faster and more efficient.
- **Improved** data accuracy by **15%** by using **SQL and Python** to identify and fix missing, duplicate, and inconsistent records, resulting in cleaner datasets and more reliable analysis for reporting.
- **Streamlined** reporting by **20%** by automating data preparation with **Python, Pandas, Excel, and Power Query**.
- **Developed 5+ reports and dashboards** using **Power BI and Tableau** to track key KPIs, analyze trends, compare performance, and provide teams with clearer insights for day-to-day business decisions.
- **Enhanced** an existing project by building a **RAG pipeline with Antigravity**, improving information retrieval from project data and helping users find relevant results faster with less manual searching.
- **Applied prompt engineering** to AI-assisted workflows, making information retrieval easier and reducing repetitive analysis tasks.

## PROJECTS

### Online Recruitment Fraud Detection Platform

Data Analyst / ML Project

Python, NLP, Pandas, Antigravity  
2024

- **Analyzed 500+ job postings** using **Python and Pandas**, checking missing and mismatched details across key posting fields.
- **Identified 5+ fraud indicators** using **NLP, text preprocessing, and TF-IDF** to detect suspicious job-posting patterns.
- **Built** a Python-based fraud scoring system to identify potentially fake job postings across 500+ listings.
- **Evaluated** predictions using **4 classification metrics**, comparing fake and genuine postings to assess detection performance.
- **Built** a browser extension that scans job postings with **1-click job scanning** and displays a fraud score on the right side of the screen for a quick assessment.

## EDUCATION

### Joginpally B.R. Engineering College

B.Tech – Computer Science and Engineering

Hyderabad  
2021 – 2025

## ACHIEVEMENTS & LEADERSHIP

- **1st Rank, B.Tech CSE:** Secured 1st rank in class throughout the program.
- **NCC Cadet:** Led and trained fellow cadets as Squad In-charge, demonstrating leadership and team coordination.
- **Lead Dancer:** Led classical and folk dance performances and taught advanced techniques to fellow students.
